Naturopathic Medicine emphasizes nourishing the body with whole foods and educates patients about healthy forms of protein, fats and carbohydrates. The ultimate goal is personal empowerment to make great choices in a way that is reasonable within a busy lifestyle and beneficial for your long-term health. Acupuncture is effective to improve body systems functions and reduce cravings. Massage Therapy helps improve body image and tone the body by increasing circulation. It also assists with stress-management, a significant factor with any weight-loss program. This inner cleansing process facilitates cellular repair, growth, and metabolic functioning. With improved nutrient absorption, toxin elimination, and cellular metabolism, our whole organism experiences a surge in health and well-being. Enjoy increased vitality, increased resistance to infections, less incidence of chronic degenerative disease, a slowing of the aging process, and a longer and healthier life. Acupuncture stimulates the body systems to cleanse and purify, and herbal therapeutics may be recommended to support your body during transition. **\$840** *(A savings of \$265)*

Chronic pain is often due to underlying imbalances, structural causes, and/ or degenerative diseases and a longer term approach may be necessary to target the underlying cause of the back pain. Herbal formulas, nutritional supplementation, and Chinese exercise therapy are combined with acupuncture to help relieve inflammation and stimulate healing. Massage Therapy and Mineral Baths assist with relaxing muscles and releasing stress that is often a root cause of pain. **\$650** *(A savings of \$235)*
